

MANN MCGOWAN

I N S T A L L A T I O N S L T D

We are pleased to announce we will exhibit at this year's Big 5 International Building + Construction show.

We are pleased to announce the launch of our Palusol® SW panel system which can be used to manufacture high quality FD 30 and FD 60 fire resisting door-sets.

Our fire test and assessment package carried out at Chiltern International Fire (TRADA) has been done in accordance with BS 476 Part 22 1987. This means that this evidence together with the entire component parts (Pyrostrip®, Pyroglaze®, Enviroseal®, Pyromas®) can be sourced from Mann McGowan to allow joinery manufacturers to produce these fire resisting door-sets without the need of conducting their own expensive fire tests.

Why not come along to the UK Pavilion in Hall 2 and visit us on Stand Number 2D-92 to find out more about this exciting product development.

We look forward to seeing you there.

Yours faithfully

Kevin Hulin

Director
